

AMENDMENTS TO THE CLAIMS

The amended claims supersede and replace the existing claims currently on file.

1. (Currently Amended) The method for registering and certifying an electronic message, ~~said method further comprising a client, an intended recipient, a local computer system, a website, a processing unit, an email database, a means to register said electronic message,~~ said method comprising the steps of: said a client using said local computer system accessing said a website and establishing a registration account; a processing unit accepting said registration account, said processing unit assigning a code to said registration account of said client; said client selecting a service request; said processing unit receiving ~~said electronic message~~ said client's service request; ~~said electronic message being from said client;~~ ~~said processing unit storing information about said electronic message and said registration account in said email database;~~ said processing unit ~~resending~~ sending said electronic message to said intended recipient as identified by said client in said registration account; said processing unit ~~tracking~~ confirming the date said electronic message was sent by said processing unit to said intended recipient; said processing unit ~~tracking~~ confirming the date said electronic message was received by said intended recipient; said processing unit creating a confirmation record ~~that comprises said date said electronic message was sent and said date said electronic message was received by said intended recipient;~~ said processing unit creating a digital certificate containing the information of said confirmation record; said processing

**Application/Control Number 09/982,145**

unit archiving said digital certificate information; and said processing unit sending  
said client a copy of said confirmation record; and said processing unit storing  
information about said confirmation record and said registration account in said  
email databasesaid digital certificate.

2. (Previously Presented) The method of claim 1, wherein said local computer system may be a remote fixed device or a remote portable device; whereby either said remote fixed device or said remote portable device access said website using the Internet or other Transmission Control Protocol/Internet Protocol based network connectivity.
3. (Previously Presented) The method of claim 1, wherein said processing unit further comprises said email database; said email database further comprising an information storage system; said information storage system further comprising a means to store data; said data further comprising said registration account data, said electronic message data, said sent date data, said received date data , and said confirmation record data.
4. (Previously Presented) The method of claim 1, wherein said registration account data further comprises said client's name, said client's email address, said intended recipient's name, said intended recipient's email address, and the email delivery services requested by said client.

**Application/Control Number 09/982,145**

5. (Currently Amended) The method of claim 1, whereby said email delivery services comprise said processing unit sending said electronic message from said client in the form of a registered email, or a certified email, or a return receipt email, or an email submission confirmation<sub>1</sub>, or an email delivery confirmation to said intended recipient, and whereby said client may select archival of the email message in conjunction with the delivery service.
6. (Previously Presented) The method of claim 1, whereby said registered email, said certified email, said confirmation record email, said email sent confirmation, and said email received confirmation are further comprised of said registration account data and said electronic message.
7. (Previously Presented) The method of claim 1, whereby said electronic message comprises at least one electronic data from the group including text data, audio data, visual data, electronic data, or an electronic attachment.
8. (Previously Presented) The method of claim 1, whereby said website further comprises a means for said client to select said delivery services and to submit said electronic message in conjunction with said delivery services to said processing unit from said local computer system.
9. (Previously Presented) The method of claim 1, whereby said processing unit further comprises a means to receive said electronic message from said

**Application/Control Number 09/982,145**

local computer system and to send said electronic message to said intended recipient in accordance with said delivery services selected by said client in said registration account.

10. (Previously Presented) The method of claim 1, whereby said processing unit further comprises a means to determine when said electronic message has been sent to said intended recipient and when said intended recipient has received said electronic message.

11. (Currently Amended) The method of claim 1, whereby said processing unit further comprises a means to ~~notify said client of~~ verify when said electronic message was sent to said intended recipient and to verify when said electronic message was received by said intended recipient.

12. (Previously Presented) The method of claim 11, whereby said processing unit compiles the submission and delivery confirmation data into said confirmation record; said confirmation record further comprising said registration account data.

13. (Previously Presented) The method of claim 12, whereby said confirmation record is in the form of a digital certificate that is emailed to said client.

**Application/Control Number 09/982,145**

14. (Canceled)

15. (Currently Amended) The method for registering and certifying an electronic message, ~~said method further comprising an anonymous client, an intended recipient, a local computer system, a website, a processing unit, an email database, a means to register said electronic message, said method comprising the steps of: said~~ a anonymous client using said local computer system accessing said a website and establishing a registration account; said processing unit accepting said registration account; said processing unit assigning a code to said registration account of said anonymous client; said client selecting a service request; said service request further comprising that said client's identity be withheld from the intended recipient; said processing unit receiving said electronic message, ~~said electronic message being~~ service request from said anonymous client; ~~said processing unit storing information about said electronic message and said registration account in said email database; said processing unit resending said electronic message to said intended recipient as identified by said anonymous client in said registration account; said processing unit notifying said intended recipient that said electronic message has been sent on behalf of said client by said processing unit; said processing unit tracking~~ confirming the date said electronic message was sent by said processing unit; said processing unit ~~tracking~~ confirming the date said electronic message was received by said intended recipient; ~~said processing unit notifying said intended recipient that said electronic message has been sent on~~

**Application/Control Number 09/982,145**

~~behalf of said anonymous client; said intended recipient choosing whether or not~~  
~~to post a reply for said client with said processing unit; said processing unit~~  
~~accepting said reply, if posted; said processing unit creating a confirmation~~  
~~record; that comprises said date said electronic message was sent to said~~  
~~intended recipient, and said date said electronic message was received by said~~  
~~intended recipient, and said reply posted for said anonymous client; said~~  
~~processing unit creating a digital certificate containing the information of said~~  
~~confirmation record; said processing unit archiving said digital certificate~~  
~~information; said processing unit sending said ~~anonymous client a copy of said~~~~  
~~confirmation record digital certificate.; and said processing unit storing~~  
~~information about said confirmation record and said registration account in said~~  
~~email database.~~

16. (Previously Presented)        The method of claim 15, wherein said local computer system may be a remote fixed device or a remote portable device; whereby either said remote fixed device or said remote portable device access said website using the Internet or other Transmission Control Protocol/Internet Protocol based network connectivity.

17.    (Previously Presented) The method of claim 15, wherein said processing unit further comprises said email database; said email database further comprising an information storage system; said information storage system further comprising a means to store data; said data further comprising said

**Application/Control Number 09/982,145**

registration account data, said electronic message data, said sent date data, said received date data, and said confirmation record data.

18. (Currently Amended) The method of claim 15, wherein said registration account data further comprises said ~~anonymous~~ client's name, said ~~anonymous~~ client's email address, said intended recipient's name, said intended recipient's email address, and the email delivery services requested by said ~~anonymous~~ client; said delivery services further comprising a request by said client to have said client's identity withheld from said intended recipient.

19. (Currently Amended) The system of claim 18, whereby said email delivery services comprise said processing unit ~~sending~~ resending said electronic message from said ~~anonymous~~ client in the form of a registered email, or a certified email, or a return receipt email, or an email submission confirmation, or an email delivery confirmation to said intended recipient, and whereby said client may select archival of the email message in conjunction with the delivery service.

20. (Previously Presented) The method of claim 18, whereby said registered email, said certified email, said confirmation record email, said email sent confirmation, and said email received confirmation are further comprised of said registration account data and said electronic message.

21. (Previously Presented) The method of claim 15, whereby said electronic

**Application/Control Number 09/982,145**

message comprises at least one electronic data from the group including text data, audio data, visual data, electronic data, or an electronic attachment.

22. (Currently Amended) The method of claim 15, whereby said website further comprises a means for said ~~anonymous~~-client to select said delivery services and to submit said electronic message in conjunction with said delivery services to said processing unit from said local computer system.

23. (Currently Amended) The method of claim 15, whereby said processing unit further comprises a means to receive said electronic message from said local computer system and to ~~send~~resend said electronic message to said intended recipient in accordance with said delivery services selected by said ~~anonymous~~-client in said registration account.

24. (Previously Presented) The method of claim 15, whereby said processing unit further comprises a means to determine when said electronic message has been sent to said intended recipient and when said intended recipient has received said electronic message.

25. (Currently Amended) The method of claim 15, whereby said processing unit further comprises a means for said intended recipient to post said ~~a~~ reply for said ~~anonymous~~-client with said processing unit.

**Application/Control Number 09/982,145**

26. (Currently Amended) The method of claim 15, whereby said processing unit further comprises a means to ~~notify said anonymous client of~~ verify when said electronic message was sent to said intended recipient and to verify when said electronic message was received by said intended recipient.
27. (Previously Presented) The method of claim 15, whereby said processing unit compiles said submission confirmation, and said delivery confirmation data, and said reply posted by said intended recipient, into said confirmation record; said confirmation record further comprising said registration account data.
28. (Previously Presented) The method of claim 15, whereby said confirmation record is in the form of a digital certificate that is emailed to said client.
29. (Currently Amended) The method for verifying the identity of ~~the~~ an intended recipient of a registered or certified electronic message, ~~said method further comprising a client, said intended recipient, a local computer system, a website, a processing unit, an email database, a means to verify said identity of said intended recipient, the means to register said electronic message, said method comprising the steps of: said client using said local computer system accessing said~~ a website and establishing a registration account; said processing unit accepting said registration account; said processing unit assigning a code to

**Application/Control Number 09/982,145**

said registration account of said client; said client selecting a service request;  
said service request including a request for identity verification, said processing  
unit receiving said ~~electronic message~~ client service request, ~~said electronic~~  
~~message being from said client;~~ ~~said processing unit storing information about~~  
~~said electronic message and said registration account in said email database;~~  
said processing unit notifying said intended recipient that said processing unit is  
~~holding said electronic message pending requires~~ verification of said identity of  
said intended recipient; said processing unit obtaining said verification  
information of said identity of said intended recipient; said processing unit  
~~resending~~ sending said electronic message to said intended recipient as  
identified by said client in said ~~registration account~~ service request; said  
processing unit ~~tracking~~ confirming the date said electronic message was sent by  
said processing unit; said processing unit ~~tracking~~ confirming the date said  
electronic message was received by said intended recipient; said processing unit  
creating a confirmation record ~~that comprises said date said electronic message~~  
~~was sent, and said date said electronic message was received by said intended~~  
~~recipient, and said verification information of said identity;~~ said processing unit  
creating a digital certificate containing the information of said confirmation record;  
said processing unit archiving said digital certificate information; and said  
processing unit sending said client ~~a copy of said confirmation record~~ said digital  
certificate. ; ~~and said processing unit storing information about said confirmation~~  
~~record and said registration account in said email database.~~

**Application/Control Number 09/982,145**

30. (Previously Presented) The method of claim 29, wherein said local computer system may be a remote fixed device or a remote portable device; whereby either said remote fixed device or said remote portable device access said website using the Internet or other Transmission Control Protocol/Internet Protocol based network connectivity.
31. (Previously Presented) The method of claim 29, wherein said processing unit further comprises said email database; said email database further comprising an information storage system; said information storage system further comprising a means to store data; said data further comprising said registration account data, said electronic message data, said sent date data, said received date data, said verification information data, and said confirmation record data.
32. (Previously Presented) The method of claim 29, wherein said registration account data further comprises said client's name, said client's email address, said intended recipient's name, said intended recipient's email address, and the email delivery services requested by said client.
33. (Currently Amended) The method of claim 29, whereby said email delivery services comprise said processing unit sending said electronic message from said client in the form of a registered email, or a certified email, or a return receipt email, or an email submission confirmation, or an email delivery

**Application/Control Number 09/982,145**

confirmation to said intended recipient, and whereby said client may select archival os the email message in conjunction with the delivery service.

34. (Previously Presented) The method of claim 33, whereby said registered email, said certified email, said confirmation record email, said email sent confirmation, and said email received confirmation are further comprised of said registration account data and said electronic message, and said verification information of said identity of said intended recipient.

35. (Currently Amended) The method of claim 29, whereby said processing unit ~~further comprises a means to notify~~ notifies said intended recipient that said processing unit ~~is holding~~ has an ~~said~~ electronic message for said intended recipient, ~~-pending confirmation of said verification of said intended recipient's identity, as specified in said client service request information.~~

36. (Currently Amended) The method of claim ~~35~~ 29, whereby said processing unit ~~further comprises a means to notify~~ notifies ~~said intended recipient what said verification information is required, as identified in said service request, comprises, and the means~~ instructions for said intended recipient to submit said verification information to said processing unit in accordance with said service request.

37. (Currently Amended) The method of claim 29, whereby said verification

**Application/Control Number 09/982,145**

information further comprises at least one of the group of: a digital certificate, or  
a personal identity paper, or a drivers license, or a passport or biometric  
information; said biometric information including at least one of the group of a  
thumbprint, or a voiceprint, or a retinal scan, or a graphical, hand-written  
signature, ~~or a personal identity paper, or a drivers license or a passport.~~

38. (Previously Presented) The method of claim 29, whereby said electronic message comprises at least one electronic data from the group including text data, audio data, visual data, electronic data, or an electronic attachment.

39. (Previously Presented) The method of claim 29, whereby said website further comprises a means for said client to select said identity verification services, and to submit said electronic message in conjunction with said verification services and in conjunction with said delivery services to said processing unit from said local computer system.

40. (Previously Presented) The method of claim 29, whereby said processing unit further comprises a means to receive said electronic message from said local computer system and to send said electronic message to said intended recipient in accordance with said delivery services selected by said client in said registration account.

41. (Previously Presented) The method of claim 29, whereby said processing

**Application/Control Number 09/982,145**

unit further comprises a means to determine when said electronic message has been sent to said intended recipient and when said intended recipient has received said electronic message.

42. (Previously Presented) The method of claim 29, whereby said processing unit further comprises a means to notify said client of when said electronic message was sent to said intended recipient and when said electronic message was received by said intended recipient.

43. (Previously Presented) The method of claim 29, whereby said processing unit compiles the submission and delivery confirmation data into said confirmation record; said confirmation record further comprising said registration account data.

44. (Previously Presented) The method of claim 29, whereby said confirmation record is in the form of a digital certificate that is emailed to said client.

45. (Canceled)

46. (New) The method of claim 15, whereby said processing unit clearly identifies the processing unit as the sender of the email, but not the originator of the email , in the form of an email to said intended recipient.

**Application/Control Number 09/982,145**

47. (New) The method of claim 46, whereby the processing unit clearly identifies a constant and verifiable email address of said processing unit and verifiable contact information of said processing unit, in said email to said intended recipient.

48. (New) The method of claim 46, whereby said intended recipient is notified that said intended recipient may choose to post a reply with said processing unit for the originator of said electronic message.

49. (New) The method of claim 15, whereby said processing unit forwards said reply from said intended recipient to said client.

**CONCLUSION**

Applicant submits that the stated grounds of rejection in the pending claims have been properly traversed, accommodated, or rendered moot. Applicant therefore respectfully requests that the Examiner reconsider and withdraw the presently outstanding rejections. It is believed that a full and complete response has been made to the outstanding Office action, and as such, the present application is in condition for allowance. Thus, prompt and favorable consideration of this amendment is respectfully requested. If the Examiner believes that personal communication will expedite prosecution of this application, the Examiner is invited to telephone the undersigned at 310-739-9996 or 310-665-0111.

Respectfully Submitted,

A handwritten signature in black ink, appearing to be 'M. Lauren', written over a horizontal line.
